

| Model             |
|-------------------|
| load->model(name) |

#### Database Selecting (ActiveRecord)

|  |
|--|
| db->get(table, limit, offset)          |
| db->get_where(table, array, limit)     |
| db->select(fields)                     |
| db->from(table)                        |
| db->join(table, condition, type)       |
| db->where(key, value)                  |
| db->where(array)                       |
| db->where_not_in(field, value   array) |
| db->like(field, value)                 |
| db->like(array)                        |
| db->group_by(field   array)            |
| db->order_by(field, sort)              |
| db->order_by(string)                   |
| db->limit(limit, offset)               |

#### Database Updating (ActiveRecord)

|   |
|---|
| db->insert(table, array   object)                   |
| db->update(table, array   object, condition, limit) |
| db->delete(table, array)                            |
| db->delete(array)                                   |

#### Query Results

|                       |
|-----------------------|
| query->result()       |
| query->result_array() |
| query->row()          |
| query->row_array()    |
| query->num_rows()     |
| query->num_fields()   |

#### Query Helper Functions

|                      |
|----------------------|
| db->insert_id()      |
| db->affected_rows()  |
| db->count_all(table) |

#### Method Chaining (PHP5)

|  |
|--|
| db->select(field)->from(table)->where(array) |
|--|

| View                    |
|-------------------------|
| load->view(name, array) |

#### HTML Table Class

|   |
|---|
| load->library("table")                  |
| table->set_heading(value1, value2, ...) |
| table->add_row(value1, value2, ...)     |
| table->generate()                       |
| table->set_template(array)              |
| table->clear()                          |

#### Form Validation Class

|                                    |
|------------------------------------|
| load->library("form_validation")   |
| set_value(field, default)          |
| set_select(name, value, boolean)   |
| set_checkbox(name, value, boolean) |
| set_radio(name, value, boolean)    |
| form_error(field)                  |

#### Alternate PHP Syntax

|                                 |
|---------------------------------|
| <?=\$variable?>                 |
| <?=lang(\$key)?>                |
| <?php if(\$number == 1): ?>     |
| <?php elseif(\$number == 2): ?> |
| <?php endif; ?>                 |

| Controller                   |
|------------------------------|
| \$this->EE =& get_instance() |

#### Control Panel Class

|                                    |
|------------------------------------|
| cp->set_right_nav(array)           |
| cp->set_breadcrumb(url, title)     |
| cp->set_variable(key, value)       |
| cp->add_to_head(string)            |
| cp->load_package_js(filename)      |
| cp->allowed_group(access_type)     |
| cp->fetch_action_id(class, method) |
| load->library("table")             |

#### Email Class

|                           |
|---------------------------|
| email->from(from)         |
| email->reply_to(reply_to) |
| email->to(recipient)      |
| email->subject(subject)   |
| email->message(message)   |
| email->Send()             |
| email->EE_initialize()    |

#### Form Validation Class

|   |
|---|
| form_validation->set_rules(field, label, rules) |
|---|

#### Functions Class

|  |
|--|
| functions->fetch_site_index(add_slash)         |
| functions->create_url(segment, trailing_slash) |
| functions->fetch_current_uri()                 |
| functions->redirect(url)                       |
| functions->hash(string)                        |
| functions->random(type, length)                |
| functions->form_declaration(array)             |
| functions->set_cookie(name, value, expire)     |
| functions->char_limiter(string, length)        |
| functions->word_limiter(string, length)        |
| functions->fetch_email_template(name)          |
| functions->fetch_action_id(class, method)      |
| functions->create_captcha()                    |

#### Input Class

|                     |
|---------------------|
| input->get_post()   |
| input->get()        |
| input->post()       |
| input->cookie()     |
| input->server()     |
| input->ip_address() |

#### Language Class

|                          |
|--------------------------|
| lang->line(key)          |
| lang->loadfile(filename) |

#### Localization Class

|  |
|--|
| localize->now                            |
| localize->set_localized_time(time)       |
| localize->decode_date(date_format, time) |
| localize->set_human_time(time)           |

#### Session Class

|                                       |
|---------------------------------------|
| session->userdata[key]                |
| session->set_flashdata(type, message) |

#### Template Class

|  |
|--|
| TMPL->fetch_param(key, default)            |
| TMPL->parse_variables(tagdata, array)      |
| TMPL->swap_var_single(key, value, tagdata) |
| TMPL->tagdata                              |
| TMPL->var_single                           |
| TMPL->var_pair                             |

#### URI Class

|                                       |
|---------------------------------------|
| uri->segment(segment_number, default) |
| uri->total_segments()                 |

#### Language Class

|                    |
|--------------------|
| show_error(string) |
|--------------------|
